

ANUP KUMAR

Product Manager

Location: Gurgaon, India | Phone: +91 87500 15821 | Email: anup.bhiram@gmail.com | LinkedIn: linkedin.com/in/anupbhiram

PROFESSIONAL SUMMARY

Product Manager with 6+ years of experience building multi-tenant B2B SaaS platforms, core API ecosystems, and monetization engines end-to-end. Proven track record scaling products from a blank canvas to INR 1.445 Billion ARR with 2,500+ enterprise partners. Expert at leading cross-functional pods, managing C-suite alignment, and executing high-impact build-vs-buy decisions based on revenue, conversion, and operational velocity.

CORE SKILLS

Platform & APIs: Multi-Tenant B2B SaaS, REST APIs, RBAC & Data Isolation, System Design, Build vs. Buy, CI/CD Releases.

Growth & GTM: Subscription Lifecycle, Retention Engineering, Campaign Management, Go-To-Market, Lifecycle Marketing.

Product Management: 0-to-1 Development, Vision & Strategy, Roadmaps, Backlog Prioritization, PRDs/BRDs, OKRs, Agile Sprint and Scrum Leadership, Cross-Functional Leadership.

AI & Data: AI/NLP Search, LLM Pipelines, Vector Embeddings, Semantic Retrieval, RAG, Real-Time Personalization, A/B Testing.

Tools: Jira, Confluence, Figma, Postman, Amplitude, Looker Studio, New Relic, MoEngage, Google Analytics, Lovable, Zoho, Notion, Gamma, Napkin, NotebookLM, ClickUp.

PROFESSIONAL EXPERIENCE

Product Manager | HT Media, Gurgaon

Jan 2022 – Present

Hands-on owner of three 0-to-1 products — Bundlr (B2B platform), the CMS, and AI Search — running sprints, daily scrums, retrospectives, and UATs, and driving cross-functional alignment across sales, data, design, engineering, solution architecture, QA, marketing, and leadership.

Bundlr – Multi-Tenant B2B Subscription Platform (0-to-1)

- **0-to-1 Scale & ARR:** Scaled Bundlr from a blank canvas to a multi-tenant B2B SaaS platform driving INR 1.445 Billion ARR, 2,500+ enterprise partners, 2M+ active users, and 80%+ MoM retention.
- **Commercial Monetization:** Partnered with CPO, CRO, CMO, and Finance to deploy behavioral renewal journeys, dashboards, and wallets, lifting ARR from 0 to INR 1.15 Billion to INR 1.445 Billion over 2 years.
- **In-House Coupon Platform:** Built an in-house Coupon Management System from 0-to-1, powering 100% of B2B campaigns and win-back workflows; introduced partner self-generation with Product Analyst-led guardrails, eliminating manual coupon creation dependency.
- **Enterprise Architecture & SSO:** Designed partner-level RBAC and multi-tenant data isolation to enable custom styling without forking code, maintaining 99.5% uptime; shipped silent login (SSO) for friction-free B2B partner app content consumption.
- **API Ecosystem & Efficiency:** Shipped a core RESTful API suite letting 800+ partners embed subscription workflows into native CRMs, eliminating manual operations and cutting support escalations.
- **Product Operations Leadership:** Acted as sole integration POC for 2,500+ partners; integrated Freshchat to reduce query times and mentored a team of 4 Product Operations Associates to handle daily platform queries.
- **Agile Delivery & Dev Velocity:** Managed all Agile delivery mechanics (sprints, scrums, retrospectives); consolidated bulk ops tooling and finance reconciliation to achieve a strict, automated 15-minute production release window.

CMS & Content Platform (0-to-1)

- **Core Infrastructure:** Built the core in-house CMS powering subscription-plan management, content ingestion, widgets, promotions, and customizable content APIs for B2B partners.
- **Strategic Integration Framework:** Led and defined the framework to onboard 15 major content partners, serving as the structural foundation for the company's bundled-subscription launch.
- **Automated Catalog Ingestion:** Built automated pipelines to ingest external OTT partner catalogs, moving the team from manual data entry to high-value validation workflows.

- **Real-Time Data Sync:** Achieved near-real-time content availability and live-streaming enablement through tech-to-tech B2B partnerships, launching titles simultaneously on partner platforms and the native app.
- **Access Governance & Pod Management:** Architected the CMS on an RBAC model to grant scoped access across 5 cross-functional teams; led the pod through scrum, sprint planning, and UATs.

AI Search, Discovery & Personalization (0-to-1)

- **Build-vs-Buy Search Transformation:** Replaced an external search vendor with a proprietary in-house AI/NLP hybrid search engine, cutting vendor costs by 40% and scaling the index to 2.4M+ documents.
- **Team Leadership & Prototyping:** Directed an 11-member pod (5 Devs, 2 Data Scientists, 2 QA, 2 Ops); built a functional MVP on Lovable to align cross-functional stakeholders on the target UX prior to core development.
- **Lexical & Intent Optimization:** Shipped lexical capabilities (prefix/postfix, phonetic, fuzziness, Levenshtein distance) and metadata routing.
- **Hybrid Search:** Evolved to AI semantic search for mood- and meaning-based queries, then shipped hybrid search combining lexical and semantic retrieval using MongoDB Vector Search with ANN (HNSW); boosted search success rate from 31% to 76% and decreased the no-suggestion rate from 60% to <5% over a period of 6 months.
- **LLM Pipelines & A/B Testing:** Built an LLM auto-tagging pipeline closing catalog metadata gaps from 38% to 4% (cutting surfacing time from 72h to <15m); designed a mutual-exclusion A/B testing framework running 14 concurrent experiments.

Associate Product Manager (B2B) | LocoNav

Oct 2021 – Dec 2021

- **Enterprise Integrations:** Managed end-to-end delivery for tier-1 accounts (Tata Motors, Airtel, Cars24, Shree Cement, Spinny) from architectural alignment through UAT to go-live.
- **Cross-Functional Delivery:** Translated complex enterprise business workflows into structured technical roadmaps executed across Engineering, Operations, and Legal teams.

Senior Product Analyst | Aeris Communications, Noida

Mar 2021 – Sep 2021

- **GTM & Conversion:** Spearheaded go-to-market plans for enterprise IoT software, driving a 20% improvement in sales conversion rates.
- **Feedback Loops:** Systematized the client demo-to-requirement pipeline, injecting structured insights directly into engineering backlogs.

Product Associate | Dyson

Sep 2020 – Mar 2021

- **Behavioral Analytics:** Mapped in-store buyer journeys and user friction points to inform retail experience strategy and regional merchandising decisions.

EDUCATION

- **AI-First Product Management Fellowship | Product Space** — May 2026
- **PGDM (MBA Equivalent) | New Delhi Institute of Management** — 2020
- **B.Sc (Hons.) Computer Science | PGDAV College, University of Delhi** — 2017

CERTIFICATIONS

- **CSPO® Certified Scrum Product Owner** – Scrum Alliance (Dec 2025)
- **MongoDB Vector Search Developer** – (2024)
- **Digital Product Management** – University of Virginia / Coursera (Mar 2024)
